

Soumyajit Saha

DATA ANALYST | SQL | PYTHON | POWER BI

Kolkata, West Bengal, India | +91-7679954937 | somusaha895@gmail.com | linkedin.com/in/soumyajit-saha-68200820a | github.com/soumojitsahaREpository-hub

PROFESSIONAL SUMMARY

2025 B.Tech Electrical Engineering graduate and early-career data analytics candidate with operational experience supporting KPI reporting, SLA monitoring, data validation, and audit-ready documentation at Airports Authority of India. Uses SQL, Python, Excel, Google Sheets, Power BI, and Microsoft Fabric to identify anomalies, conduct custom analysis, and translate data into actionable takeaways. Demonstrates problem solving, critical thinking, independent learning, teamwork, and clear knowledge sharing.

TECHNICAL SKILLS

Data Analysis: Data cleaning, data validation, anomaly identification, exploratory data analysis, KPI and SLA reporting, custom analysis, data lifecycle, dashboards, business recommendations

Programming and BI: SQL, Python, pandas, Excel, Google Sheets, Power BI, DAX, Power Query, Microsoft Fabric, SQLite, Plotly, Streamlit

Collaboration and AI: Google Workspace (Gmail, Chrome, Docs, Sheets), Git, GitHub, documentation, prompt engineering, LLM evaluation, AI-assisted analytics

PROFESSIONAL EXPERIENCE

Graduate Engineering Apprentice | Airports Authority of India | Apr 2026

- Supported KPI monitoring and SLA tracking across operational workflows, preparing structured reports for cross-functional teams and decision-making.
- Validated operational records, identified inconsistencies, and maintained accurate, audit-ready documentation within SOP-driven environments.
- Assisted process improvement by organizing data, analyzing recurring operational issues, and communicating actionable findings to stakeholders.

Academic Engineering Internships | Damodar Valley Corporation and WBSEDCL | Diploma and B.Tech training

- Supported technical documentation, field operations, operational reporting, and record validation while collaborating with engineering teams.

SELECTED ANALYTICS PROJECTS

Enterprise ITSM Analytics Agent with Secure SQL Guardrails | Python, SQLite, Streamlit, Plotly

- Transformed 141,712 event-level records into an incident-level analytical dataset covering 24,918 unique incidents; validated grain, duplicates, missing values, SLA outcomes, and resolution metrics.
- Built a Streamlit analytics assistant with SQL guardrails, automated KPI generation, incident trend analysis, and interactive visualizations for natural-language operational analysis.

Retail Analytics using Microsoft Fabric | Microsoft Fabric, SQL, Power BI

- Built an end-to-end workflow for data cleaning, transformation, business modeling, and executive dashboards; analyzed sales performance and customer trends to produce actionable insights.

LLM Response Ranking Benchmark | Python, LLM Evaluation, Prompt Engineering

- Designed reproducible scoring and ranking workflows to compare multi-model responses for relevance, completeness, consistency, and evaluation reliability.

PORTFOLIO HIGHLIGHTS

- Built an AI-assisted analytics portfolio spanning ITSM operations, retail analytics, and LLM evaluation using SQL, Python, Streamlit, Power BI, and Microsoft Fabric.
- Maintain documented GitHub projects demonstrating data cleaning, validation, modeling, dashboards, secure querying, and reproducible evaluation workflows.

EDUCATION AND CERTIFICATIONS

B.Tech, Electrical Engineering | Aliah University , Kolkata - WB | 2025 | CGPA: 6.85/10

Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Linear Programming, Neural Networks, Industrial Economics and Management

Diploma, Electrical Engineering | WBSCTE | 2021 | 84.1%, First Class with Distinction

Certifications: Google AI Essentials (Coursera, Jun 2026); Google Prompting Essentials (Coursera, Jun 2026); Microsoft Power BI Data Analyst (PL-300) training - in progress
